Subject: Gavin Power LLC - Alternative Demonstration

Hello Vlad and Archie,

On October 21, 2020, EPA received a demonstration from Gavin Power LLC for the use of 257.103(f)(1) for General James M. Gavin Plant in Cheshire, Ohio. EPA is currently evaluating the demonstration for completeness. Once EPA completes this review, the facility will be notified that their demonstration is either complete or incomplete. If the demonstration is found to be incomplete, the facility will receive a letter/email describing the deficiencies of the demonstration. They will be allowed to correct the demonstration and submit a new demonstration by November 30, 2020. If the demonstration is found to be complete, the deadline to cease receipt of waste will be tolled until EPA reaches a final decision on the demonstration. EPA will propose a decision on the demonstration and will provide a 15 to 30-day public comment period. EPA encourages the state to review the demonstration and provide comments during this time. After EPA addresses any significant comments, EPA will issue a final determination.

EPA is maintaining a table of all submitted demonstrations and the current review status of the demonstrations at <https://www.epa.gov/coalash/ccr-part-implementation>.

If you have any questions or concerns, please contact Kirsten Hillyer (cc'd) and cc Susan and me.

Sincerely,

Jessica Schumacher
